Assignment 3 Solutions

Data Avicenna

2025-06-03

Setup

Use palmerpenguins and ggplot2 package:

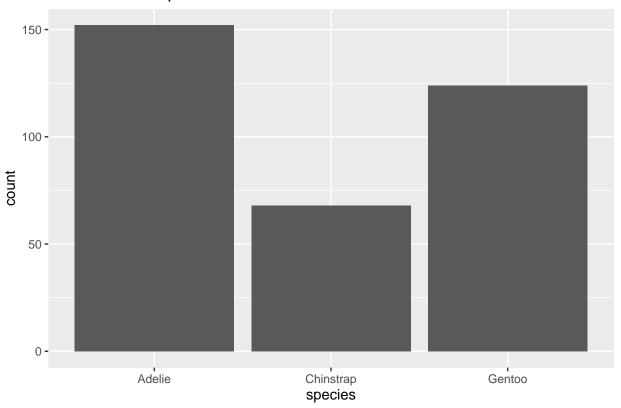

```
library(palmerpenguins)
library(ggplot2)
```

Question 1

Bar graph:

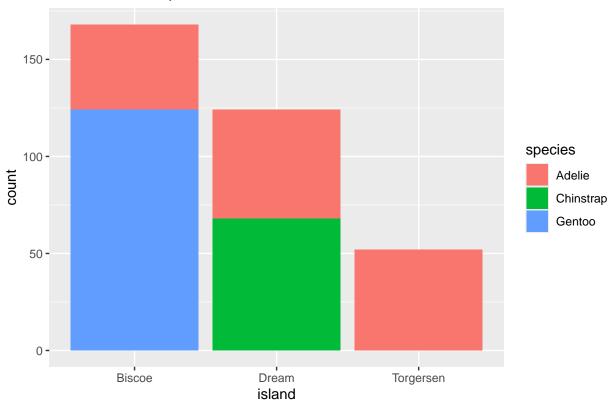

```
ggplot(penguins, aes(species)) +
  geom_bar() +
  labs(
    title = "Distribution of species")
```

Distribution of species

```
# Check number of species (optional)
library(tidyverse)
## -- Attaching core tidyverse packages ----- tidyverse 2.0.0 --
## v dplyr
           1.1.4
                      v readr
                                  2.1.5
## v forcats 1.0.0
                       v stringr 1.5.1
## v lubridate 1.9.4
                      v tibble 3.2.1
## v purrr
             1.0.4
                      v tidyr
                                 1.3.1
## -- Conflicts ------ tidyverse_conflicts() --
## x dplyr::filter() masks stats::filter()
## x dplyr::lag()
                 masks stats::lag()
## i Use the conflicted package (<a href="http://conflicted.r-lib.org/">http://conflicted.r-lib.org/</a>) to force all conflicts to become error
penguins %>%
count(species)
## # A tibble: 3 x 2
   species
   <fct>
             <int>
## 1 Adelie
              152
## 2 Chinstrap
                 68
## 3 Gentoo
                124
Stacked bar chart:
ggplot(penguins, aes(island, fill = species)) +
 geom_bar(position = "stack") +
  labs(
   title = "Distribution of species across different islands")
```

Distribution of species across different islands

In the penguins dataset, the highest number of observations of species is Adelie, corresponding to 152 observations. Then, there is Gentoo and Chinstrap in which each has 124 and 68 observations.

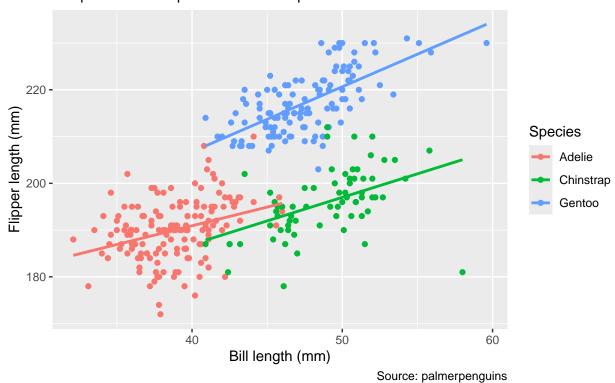

Visualizing the distribution of species across different islands, we find that the Adelie species is distributed across all three islands, while the Chinstrap species only reside in Dream island and the Gentoo species only reside in Biscoe island.

Question 2

Warning: Removed 2 rows containing missing values or values outside the scale range

(`geom_point()`).

Correlation between bill length and flipper length All species show a positive relationship

All species of penguins show a positive relationship between bill length and flipper length.
